Available in a wide range of colours and three protection levels

**Which protection level?** The **Pro-Impact** offers ultimate protection whilst being lighter and thinner than the **Hi-Impact** which offers similar protection but is bulkier. These tend to be used for sports involving sticks, hard balls or bats (eg. hockey or lacrosse), or where the head may be a specific target (eg. boxing or martial arts). The **Mid-Impact** will be adequate for most other sports and should protect against the normal blows that might be received.
